

Primary Sector Education Programme for Secondary School Students

Here at the Hawke’s Bay A & P Society, we are passionate about growing the knowledge bank and capability of the Primary Sector with our future generation. We recognise that due to an increasingly urbanised population, many students do not have direct links to farms, orchards and food production systems, which in turn, means that their understanding of future opportunities may be limited.

The Hawke’s Bay A & P Society see the exposure to future possibilities vital to attracting young people to the wide variety of career options and career pathways to encourage employment in the Primary Sector.

This year, we are launching the ‘**FutureUp**’ Education Programme for secondary schools, to fit across two of our events; the National Horticultural Field Days AND the NZ Royal A & P Show. This means that students will have two opportunities to interact with horticulture and agriculture in the Primary Sector.

Register NOW to be a part FutureUp Education Programme *(places are limited)*

The events

- Two Education Days – 1. National Horticultural Field Days. 2. NZ Royal A & P Show
- Morning tea and lunch provided for the programme
- Each group of secondary school students will engage with and rotate around a variety of interactive modules hosted by industry experts
- Opportunities provided to network with industry professionals and further education providers
- Free of charge

Who attends

- Local and out of district high schools are invited to bring their junior school students along; aged 13-15 years. Other ages can attend by arrangement.
- **FutureUp** is designed to appeal to students with cross curricular interests obviously from Ag and Hort classes and also including students studying maths, finance, science, social sciences and students who know they have an affinity with food producing but are looking for their niche.
- Education staff including teachers, HOD’s and Deans or Careers Advisors. Develop an authentic understanding for opportunities within this billion-dollar industry and grow vital links with key people.
- Connect with industry professionals and tertiary education providers.

How the day will run
